

EQUIPMENT MANAGEMENT SOLUTION

Automate creation of equipment management plans. Generate replacement schedules. Visualize plans and financials.

Benefits

- Save hours of valuable and skilled resources.
- Eliminate costly errors.
- Easily share and maintain plans internally and with clients or vendors.

How?

- Generate equipment management plans from uploaded asset inventories.
- Create equipment management plans for new sites from expected usage volumes.
- Reconcile replacement, service schedule, and price for individual equipment.
- Price in services.
- Create and manage equipment replacement projects.
- Generate detailed reports of plans and financials.

"RedBand created a significant time- savings tool for my team at Philips. What used to take a week of tedious, detailed work that was often fraught with user error has now been reduced to half a day. Even better, the output is standardized and replicable. I can't imagine we would have received anything better or faster anywhere else."
